

ConstructionU Training Inc, formerly known as BGC Partners Inc, has been training leaders in the construction industry since 2010. We offer online self-paced courses and live online courses. We also offer private in-person training seminars for construction companies and associations throughout Canada. Our team of instructors deliver practical and enjoyable courses tailor made for construction company leaders. ConstructionU believes that well trained staff are the key to success in construction. Leaders from over 3500 construction companies and industry associations can attest to the value of our courses.

#### **AVAILABLE COURSE LIST:**

- **Construction Estimating** - Participants will learn skills and knowledge to estimate construction projects and prepare a successful bid. The course is designed for construction estimators and those with experience in construction that desire to be estimators or improve their knowledge of estimating.
- **Project Management** - Participants will develop skills and knowledge of how to manage a construction project. Participants will gain an understanding of the project processes and constraints encountered by project managers (using the current PMBoK approach) and how to successfully manage a complex project.
- **Negotiation and Conflict Management** - As constructors work with clients, subcontractors, and consultants on projects, conflicts arise, and relationships may get strained. Participants will improve their skills in communication and negotiation on construction projects. Participants will learn skills to enhance their ability to de-escalate conflict, listen effectively, build mutual respect with others in a construction context, and negotiate effectively.
- **Project Accounting & Cost Control** - The Project Accounting and Cost Control course is designed for construction company owners, project managers, project coordinators, estimators, accountants, and staff to develop an understanding of accounting processes as it relates to construction projects. Participants will learn how to design and read various construction financial reports and improve the financial systems of their construction company
- **Project Management Essentials** - Participants will develop skills and knowledge of how to manage a construction project. Participants will gain an understanding of the project processes and constraints encountered by project managers (using PMBoK approach) and how to successfully manage a complex project.
- **Construction Business Management** - Participants will learn how to improve the management and business systems of their construction company
- **Change Order Management** - Changes are an inevitable part of the construction process but if not managed well, change orders can cause unnecessary project disruptions and lead to cost increases and schedule delays. This course will provide participants with best practices for successfully navigating this complex project management challenge.
- **Construction Law** - The Construction Law course is designed to develop an understanding of contract law as it relates to construction. The participants will build practical skills and learn how to effectively and proactively deal with conflict situations and avoid litigation. The course will also review other construction related law such as builders' liens, collecting debts, bonding, insurance, environmental law and safety law.

- **Supervisory & Management Skills** - Participants will improve their skills in leadership, management, and supervision of staff. Participants will learn skills to enhance their ability to build a collaborative team culture with their staff and on job sites.
- **Site Leadership** - Would you like to improve your construction site leadership skills? Participants will enhance their ability to build a collaborative team culture with their staff, improve job site productivity and complete projects on time, on budget, and safely.
